WORK EXPERIENCE

Talentissimo

(-)

Building a blogging website

Made a custom-coded PHP blogging website for people with giftedness.

Starling Days

(-)

Designing and creating a band website

Designed and created a band website for the band "Starling Days". Updates site and manages hosting.
https://starlingdays.com

PraktijkBijBaan

(-)

Building a full-stack website for education

Developing a full stack website where people with less knowledge can find jobs that appeal to them and bring them in contact with people that can give them this job!

Karen.pics

(-)

Frontend developer

A website where people can upload images and share them easily.
https://karen.pics

SeasonMC

(-)

Developer & Manager

Developer for the Minecraft server SeasonMC. Developed Minecraft plugins. Also made business decisions.

Snowcloud

(-)

Developer

Created a web portal where users could notify of their absence, see the staff list, view banned users, Give users strikes, appeal them, Demote/promote them and much more.

Wearning

(-)

Owner & Developer

Developed a website that would get the current weather and the wardrobe of the user, and would give the user the best combination of clothes to wear for the day.

Minecraft Quest

(-)

Full-stack Developer

Developing a website that shows users a bingocard, and lets them complete it in Minecraft. The 2 systems are linked to eachother using Java and web apis. This would automate (almost) the entire event.
